Subject: Adopt IOM's recommendation that women's preventative health care and contraception be covered by health care plans
Date: Thursday, August 11, 2011 5:54:08 PM

Good day. I am writing to you to provide my support that the Dept. of Health and Human Services adopt the Institute of Medicine's recommendations that women's preventative health care be completely covered by any new health insurance plans and under the new health care reform law.

I also ask wish that you reject any exemptions for religious employers. All women no matter what their employer's affiliation should be able to access preventative health care and contraception.

I encourage you to allow women to have the right to choose the type of care that they wish without any employer exemptions.

Thank you for your time and consideration.
